

A superhighway for the delivery  
& tracking of information,  
documents, and eLearning.

MyHYPERTrack provides a web solution that allows your internal and external information and training to flow freely yet provides a management tool that puts you in control.

Developed and refined over the last 20 years, the product delivers and keeps track of any kind of information including online and classroom training, written documents, video, sound, CAD, and others.

### Here's what MyHYPERTrack Learning Management System can do for your organization:

#### Automatically deliver & track any type of training resource or document along with all viewer's activity, including:

- When document was viewed, read & understood
- Dates courses "started" & "completed"
- Survey responses & comments
- Quiz scores (if applicable)

**Assign via email or on-demand.** Assign training and media to anyone with embedded links to the resource. The user can also view the resource by clicking "start" in the Library.

**Create Activity Reports, instantly.** Activity reports are saved automatically and can be accessed 24 hours a day. Build reports by viewer or resource!

**Process "new hire" paperwork.** Send a single email to new employees with all the documents they need review and fill out. They can review and complete them online – eliminating your need to handle paper manually. *Easy and convenient!*

#### Upload, assign, view & track any of these resources:

- Interactive training (*SCORM 1.2 Vendor, your own PowerPoint, and others*)
- Online auto-scoring tests (*create yourself in MyHYPERTrack*)
- Auto-tabulated online surveys (*create yourself in MyHYPERTrack*)
- Text & written documents (*Word, Excel, PDF, etc.*)
- Photos, maps & CAD drawings
- Live classrooms, webinars & online conferences (*GoToMeeting, etc.*)
- Video, sound clips, and other animations
- *Most any media that can be displayed on a computer!*

**The interface is  
simple to learn, and  
the task-based design  
makes management  
quick & easy.**
